

AUDI S4 B9 3.0T CATCHCAN KIT INSTALLATION INSTRUCTIONS.

Please thoroughly read through and familiarize yourself with these instructions in their entirety prior to beginning any part of the installation process of any component. Please also ensure the vehicle and engine has cooled down sufficiently to avoid risking possible skin burns or other injury.

Tools required:

- 3mm, 5mm Allen key
- 10mm, 13mm spanner.

1. Open and secure the bonnet. Ensure the turbo and engine has cooled down fully, as the turbo is situated on top of the engine and will remain hot for a long time after the vehicle has been switched off.

Engineered for performance

2. Pull the engine cover upwards to remove it from its mounts.

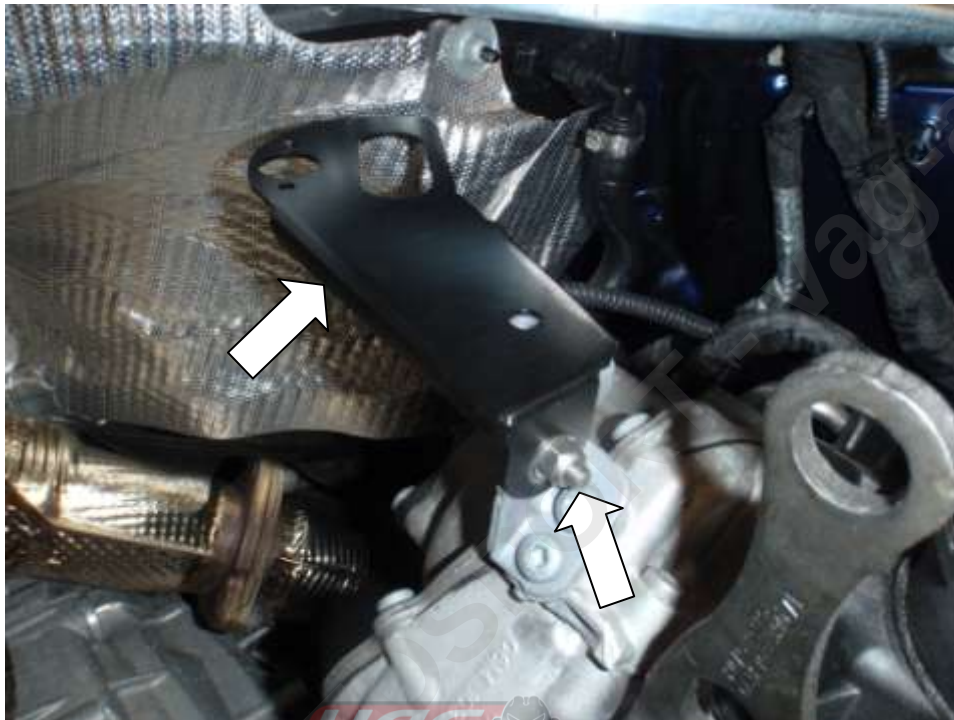

3. Using a 13mm spanner undo 4x engine cover mounts and remove the metal heat shield.

Engineered for performance

4. Secure the catchcan bracket provided with the M6x16mm Allen cap bolt, 2x 6mm washers, M6 Nyloc nut.

5. Using the 2x M4x8mm Allen cap bolts provided secure the catchcan in position. Ensure that the drain tap on the bottom of the catchcan is in the closed position.

Engineered for performance

6. Disconnect the OEM breather hose from the cam cover.

7. Use hose 1 to connect the cam cover breather outlet to the inlet side of the catchcan.

Engineered for performance

8. Use hose 2 to connect the outlet to the OEM breather hose. Install the hose clamp provided in the position shown.

9. Re-assemble your vehicle. Your installation is now complete.

Please note: We advise frequent checks initially until you are familiar with the amount of contaminants the catch can collects from your engine.
For trouble, free engine breathing always empty when the level indicator on the dipstick has been reached.
